

Degree Apprenticeships

What prompted the changes

- Richard Review – 2012
- Apprenticeships reformed to increase productivity
- Targets were set for 3 million apprenticeships by 2020 and that 2.3% of an employer workforce should be on an apprenticeship
- Levy was introduced in 2017
- Larger employers are required to spend 0.5% of their annual pay bill on apprenticeships
- The money is held centrally by UK government
- If the funds are not used they will be passed on the SME's
- Apprenticeships are aligned to standards set by groups of employers
- A group must comprise of a minimum of 10 employers
- A set of standards will read similarly to a job description
- 426 Standards are currently being developed of which 40 are for degree apprenticeships
- Employers have solved this by putting existing employees onto schemes (NHS – Nursing degree)

How do they work?

- All degree apprenticeships are employer-led
- Applications are made to the employer
- universities contracted to deliver the academic modules
- Degree apprentices study the same modules as undergraduates, but on a flexible programme
- Apprentices should be allowed 20% time for study e.g. 8 hours per week

How are they assessed?

- Changes have been made to the way apprenticeships are assessed
- Most are assessed at the end of the apprenticeship rather than throughout
- Assessment is often with external assessors and grades are awarded: Pass, Merit, Distinction
- All degree apprenticeships are individual and will be assessed differently. There is not one model

Who are they for?

- Wide age range with no limits
- Some degree apprenticeships are almost exclusively undertaken to upskill existing staff (NHS – Nursing degree)
- Many are available to new joiners
- Available to graduates

What are the benefits?

- Good employability prospects
- No debt
- Academic study is applied 'next' day in the work place
- Often more than one qualification is obtained e.g. Degree plus Chartered Management certification
- Allow access to Higher Education

How can you find them?

- There is no one site
- Popular search engines include;

UCAS

McLaren Racing

McLaren Racing has one single mission:
To win Grands Prix and World Championships

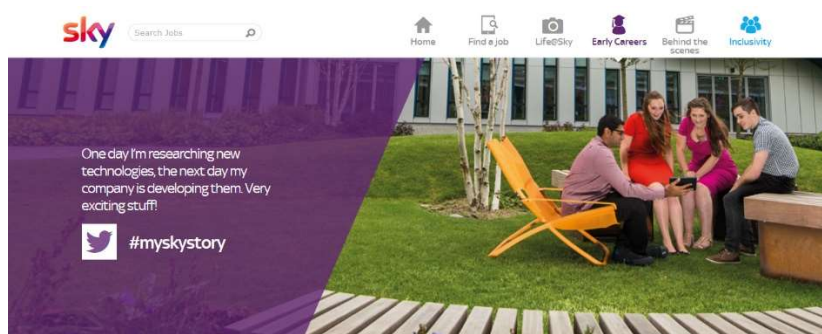

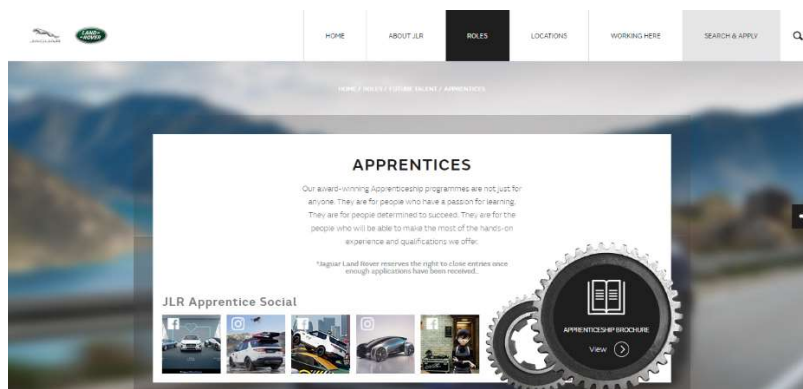

To design, build and operate a Formula One car at race-winning levels requires focus, ambition, imagination, dedication and attention to detail.

Our successful racing heritage has been driven by a relentless desire to innovate. Whether it be Bruce's early experiments with four-wheel drive or pioneering the use of a full carbon fibre construction we have led the way in developing ground-breaking technologies now applied in the wider world.

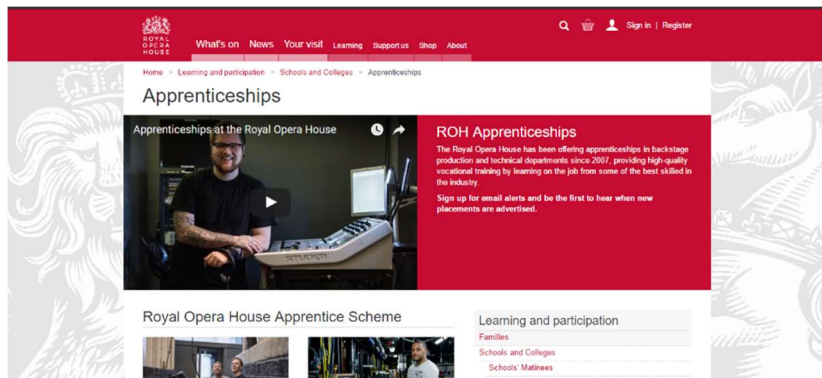

Our business is the sum of our people. From stores person to aerodynamicist, mechanic to software developer, materials buyer to graduate engineer, each individual offers a vital contribution to our past and future successes.

That's why we recruit the most highly skilled in the industry and develop the most talented apprentices and graduates who supply the lifeblood of our team, and who make the McLaren Technology Centre one of the most exciting environments to build your career in.

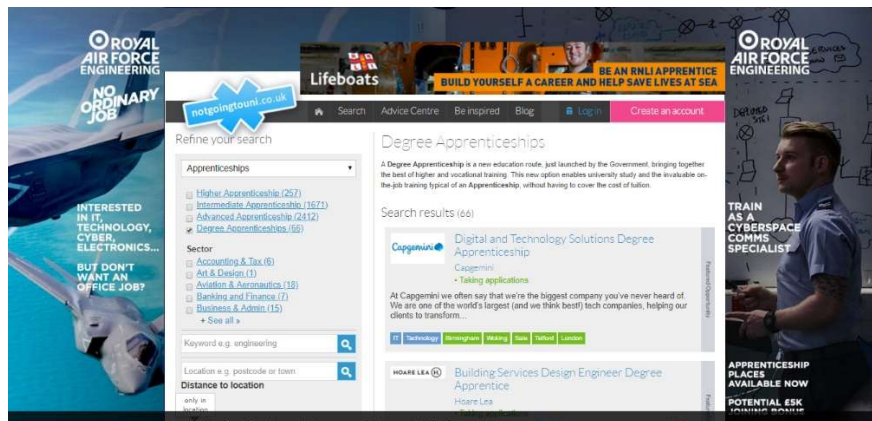

Apprenticeship programmes

As an Apprentice at Sky you'll work on projects that shape the future of our business. All our apprentices work towards professional
